

Mike and Shelly Ludka

1- **What got first interested in this car/cars?** I first became interested in cars back in the 60's. The 1st car I remember my parents having was a 1964 Chevy Impala SS - it was dark blue, white top convertible with baby blue interior and a 327 under the hood. From what my father (died in 1985) has told me and what my mother has confirmed - it sounds like my Dad was an "old greaser", so I guess that's where I get from.

2- **Where did you find this car?** I found this car in Connecticut. I traded my 1973 big block corvette and some cash for it. I worked with the previous owner for three years. This is interesting..... One day, I drove my 73 into work and I hear this voice coming through the office - "Hey, who's got the orange pumpkin out in the parking lot". My 73 was orange. Well, Jack just had to see it, so we went down and I showed him my car. While showing him mine - he starts describing his. Then he showed me pictures of his and I said "Don't sell that until you talk to me first". Well - three years later Jack needed some cash for his son's schooling - so we made a deal.

3- **Shape was it in when you purchased it?** Pretty good shape - the previous owner treated it (the car) as a trailer queen. In five years he put 202 miles on it, this was verified by the date and mileage written on the oil filter.

4- **Bio** - Frame off restoration was completed in 1990. Rare: One of approx. 286 1972 Corvette with LT-1 with factory air conditioning. The LT-1 Corvette came from the factory with mechanical lifters, high rise manifold, holly carb and a 4 speed.

5- **Car specs:**

- 1- engine - Numbers matching LT-1
- 2- trans - Matching numbers also
- 3- drive train modifications - none
- 4- suspension - stock
- 5- Interior/exterior modifications? - stock
- 6- exhaust - stock
- 7- co\$t - LOL..... will my wife see this?
